# Edit parent style

You can edit the parent style number and assign a parent style type and number for single and multiple articles and styles. To do so, follow these steps:

1. View the article or style then select Edit parent style from the Actions menu, the following window appears:

2. Select the parent style type, if it has a value other than "Parent", you can select the parent model number, otherwise, the field is deactivated,
3. Select the parent style number, as mentioned before, this field is only activated if the style type is other than "Parent", the style name is displayed in its field,
4. Click **Update**, the parent style is assigned to the selected article.

You can also assign parent style for multiple articles or styles by selecting them then clicking Edit parent style.
