

Saved views

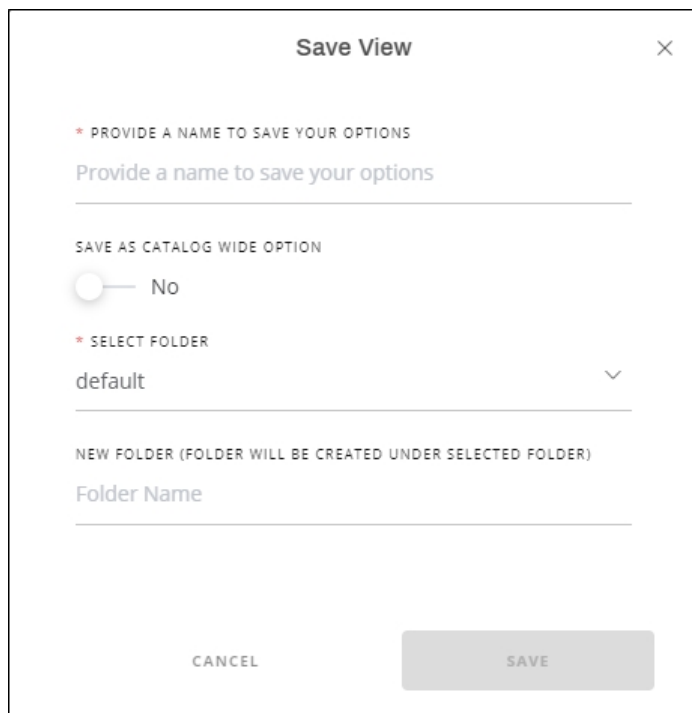

You can display the articles and group them, if you want, based on your preference using the row and column dividers, or filters, then save the displayed articles. Saved views can be managed through the **Saved views** tab as shown in the below example:

Your saved views and the catalog level views or Predefined views, are listed in a tree structure within folders and you can click any of them to display articles as per the selected view. You can also change the order of views in the folder by dragging and dropping the views in the order you want, as well as the order of folders of saved views.

You can save the preferred view by following these steps:

1. Go to the Saved views tab by clicking ,
2. Click the add button, the following window appears:

Save View [X]

* PROVIDE A NAME TO SAVE YOUR OPTIONS

Provide a name to save your options

SAVE AS CATALOG WIDE OPTION

☐ No

* SELECT FOLDER

default [v]

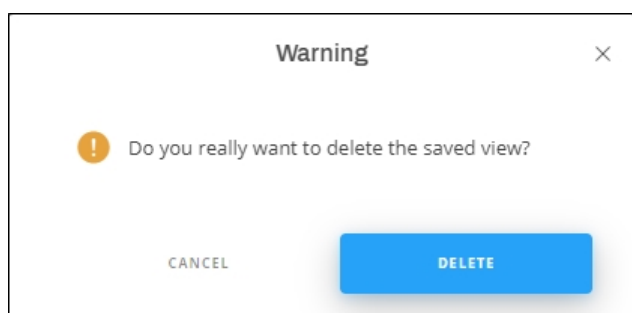

NEW FOLDER (FOLDER WILL BE CREATED UNDER SELECTED FOLDER)

Folder Name

CANCEL SAVE

3. Enter the view name, and if you are an admin user then you can select whether you want this view to be available for all catalog users,
4. Select the folder to which the view is saved, or enter the new folder name which will be created under the selected folder,
5. Click **Save**.

To delete any of the saved views, hover the mouse over any of the views then click , the following message appears:

Warning [X]

 Do you really want to delete the saved view?

CANCEL DELETE

Click **Delete** to confirm deleting the view.

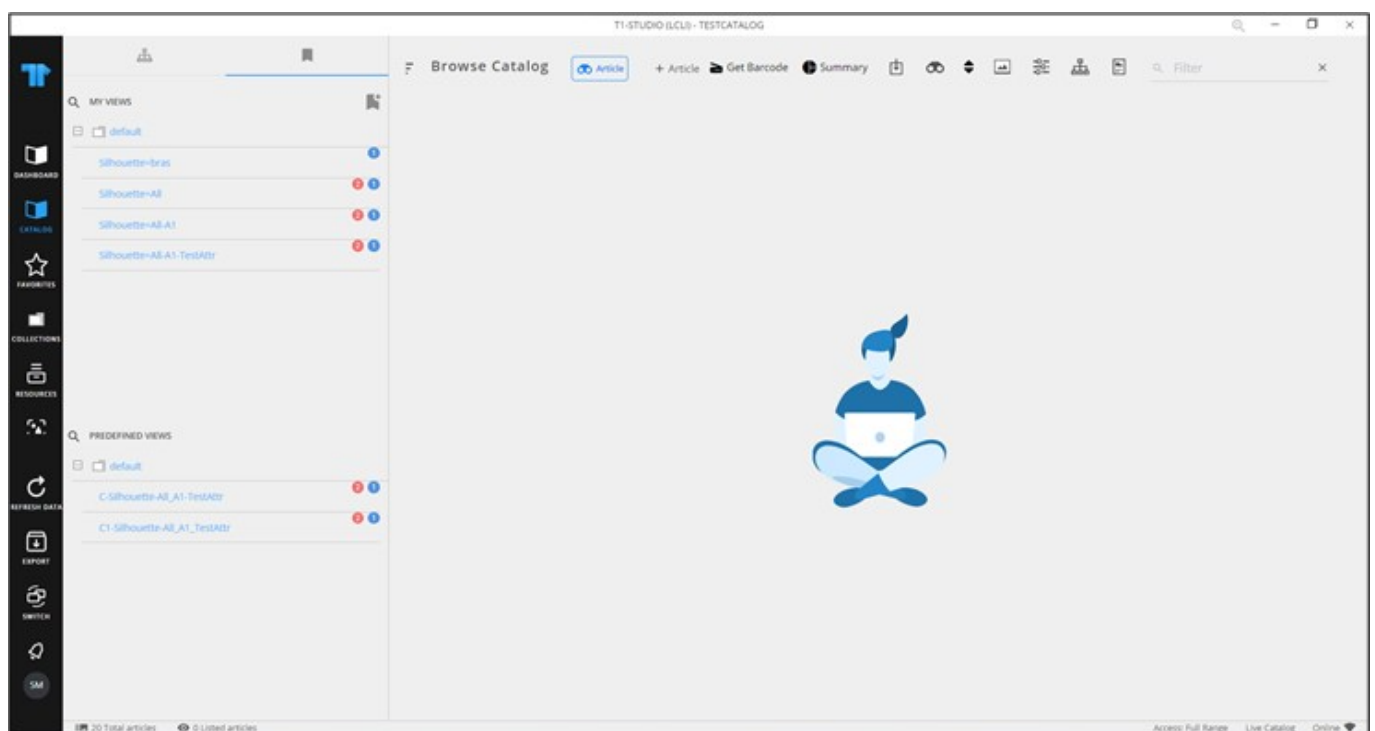

You can generate slides for the displayed articles by clicking  then selecting the template you want. Follow the steps that are mentioned in the "[Merchandising Boards](#)" module for

each template.

You can view and add comments to saved views as mentioned in "[Saved view comments](#)".

Notes:

- Notification for changes done to catalog articles and requests are displayed as bubbles as shown in the below example:

The blue bubble shows notifications for request articles while the red bubble shows notifications for catalog articles. When the bubble is clicked, changes are detailed as shown in the below example:

Articles are listed and for each one, the change details are displayed. Logs are generated once a day at a specific time.

- If the catalog is configured to display ordered quantities and approved quantities, those quantities are displayed as shown in the below example:

Quantities are also displayed on article or model thumbnail. This information is only displayed if you have the required privilege.
