T1 Studio is a desktop application through which you can access your catalogs, view the articles, select your favorites, and place orders. You can also export articles and customize their details to create a visual representation of your products. The application can be used without the need to have an internet connection the whole time. However, it is necessary to be connected to the internet to perform certain actions such as logging in to T1 Studio, getting the updated catalogs, sending orders, and downloading and uploading your favorites.

The following sections discuss how to install the application and perform these tasks.
