

Deactivate colorway

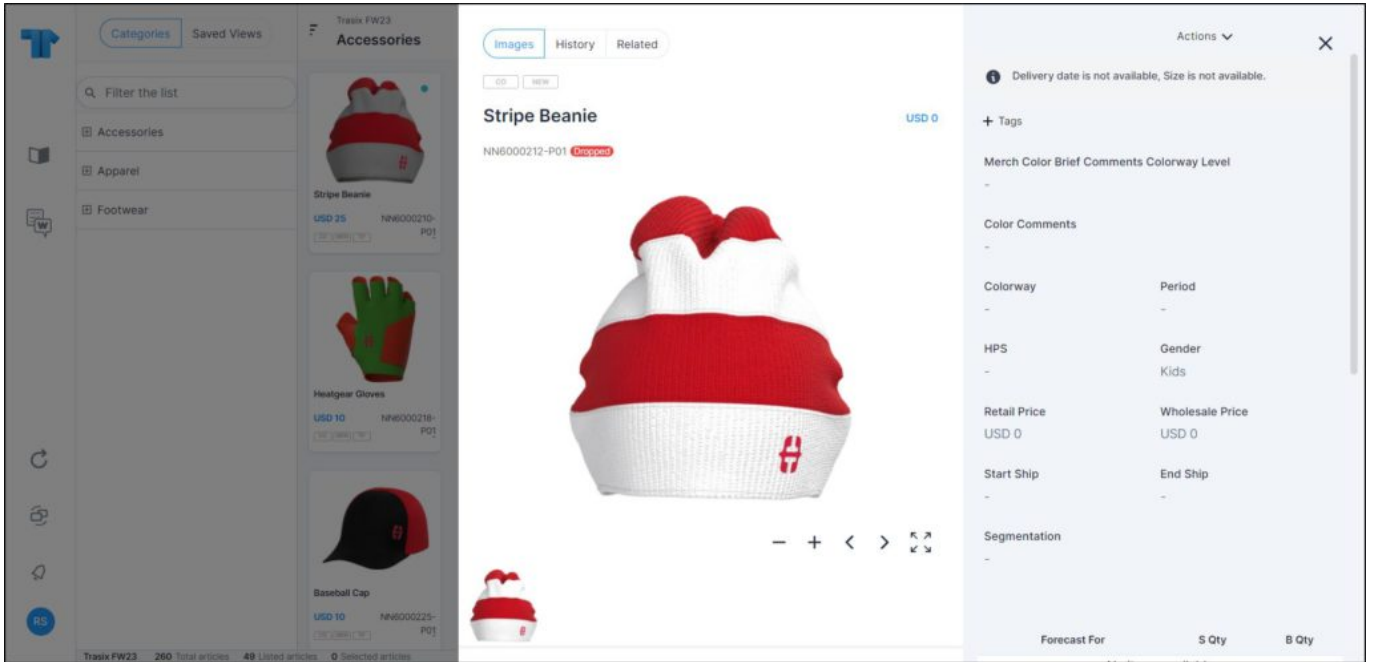

To deactivate any of the catalog colorways, if you have the required privileges, view the colorway you want, then select **Deactivate** from the Actions menu, the following window appears:

The screenshot displays a product management interface. On the left, a sidebar contains navigation icons. The main area shows a chart titled 'SKUs' with a blue bar representing the number of SKUs for the season 'SS24'. Below the chart is a table with columns for SEASON, 6M, Q1, Q2, Q3, Q4, STORY TIER, CALENDAR, and COMP STYLE. The row for 'SS24' is highlighted in yellow, and the 'Q1' column contains a red 'X' over the text '109 - Apparel'. On the right, a 'Deactivate' dialog box is open, asking 'Are you sure you want to deactivate 6001456-P04?'. It features a 'DROP REASON' dropdown menu and 'Cancel' and 'Deactivate' buttons.

Select the drop reason then click **Deactivate**. Drop reasons are configured at the seller level. The selected colorway is deactivated.

You can also select more than one colorway, then click **Deactivate**.

Depending on the layout, the colorway can be marked as **Dropped** as shown in the below example:

Or the deleted colorway is marked with a red horizontal line as shown in the below example:

All attributes are deactivated and cannot be updated. You can activate the colorway as mentioned in the following section.

Note:

- For child catalogs, you cannot select the drop reason as it is cascaded from the master catalogs.
