

## Edit parent model

You can edit the parent model number and assign a parent model type and number for single and multiple colorways and models. To do so, follow these steps:

1. View the colorway or model then select Edit parent model from the Actions menu, the following window appears:

2. Select the parent model type, if it has a value other than “Parent”, you can select the parent model number, otherwise, the field is deactivated,
3. Select the parent model number, as mentioned before, this field is only activated if the model type is other than “Parent”, the model name is displayed in its field,
4. Click **Update**, the parent model is assigned to the selected colorway.

You can also assign parent model for multiple colorways or models by selecting them then clicking Edit parent model.
