

## Generate slides - Visual line builder

You can create slides containing the colorways you want using the Visual line builder template. To do so, click **Generate**, the following window appears:

The screenshot shows a dialog box titled "Generate Slides" with a close button (X) in the top right corner. At the top, there is a progress bar with five steps: 1. Template, 2. Articles, 3. Map Columns, 4. Options, and 5. Finish. Below the progress bar, there is a text prompt: "Please select the template you would like to use and the source from where the colorways will be loaded". Underneath, there is a dropdown menu for "TEMPLATE" with "Visual line Builder" selected. Below that, there are radio buttons for "COLORWAYS SOURCE (LIMIT 150)". The "Full Catalog" radio button is selected. Other options include "Favorites", "List of Colorways", "List of Styles", "Excel File", and "Saved Views". At the bottom right, there are "Back" and "Next" buttons.

Select "Visual line Builder" from the Template dropdown list. You can either include all catalog colorways, your favorite colorways, add colorways as a list or using an Excel file, or select the colorways listed by any of your saved views.

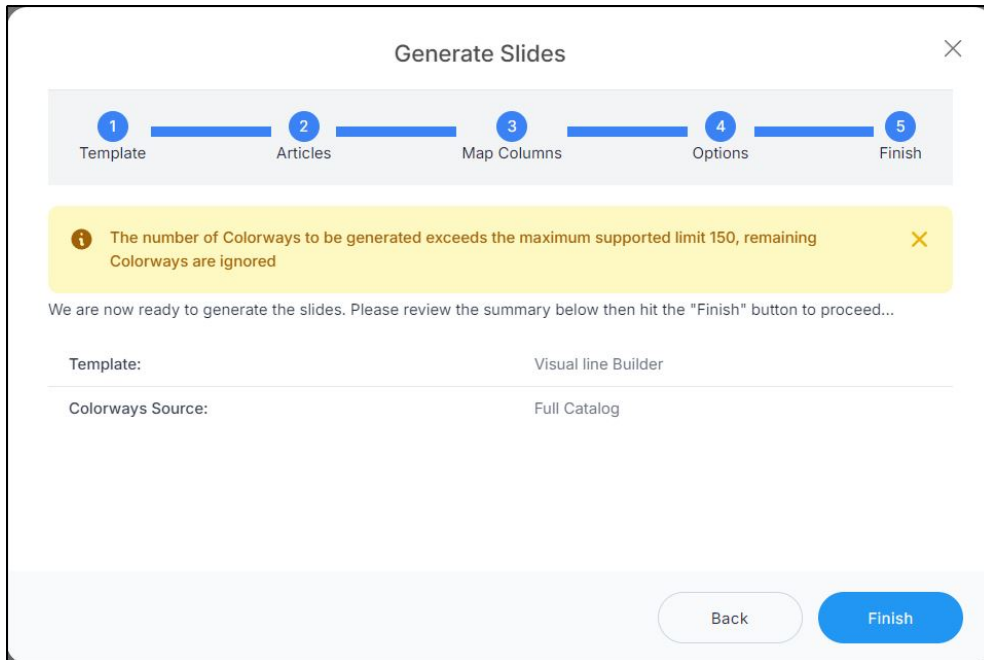

### Full catalog

To generate slides for all the colorways in the catalog, follow these steps:

1. Select the radio button next to (Full Catalog), then click **Next**, the following window appears:

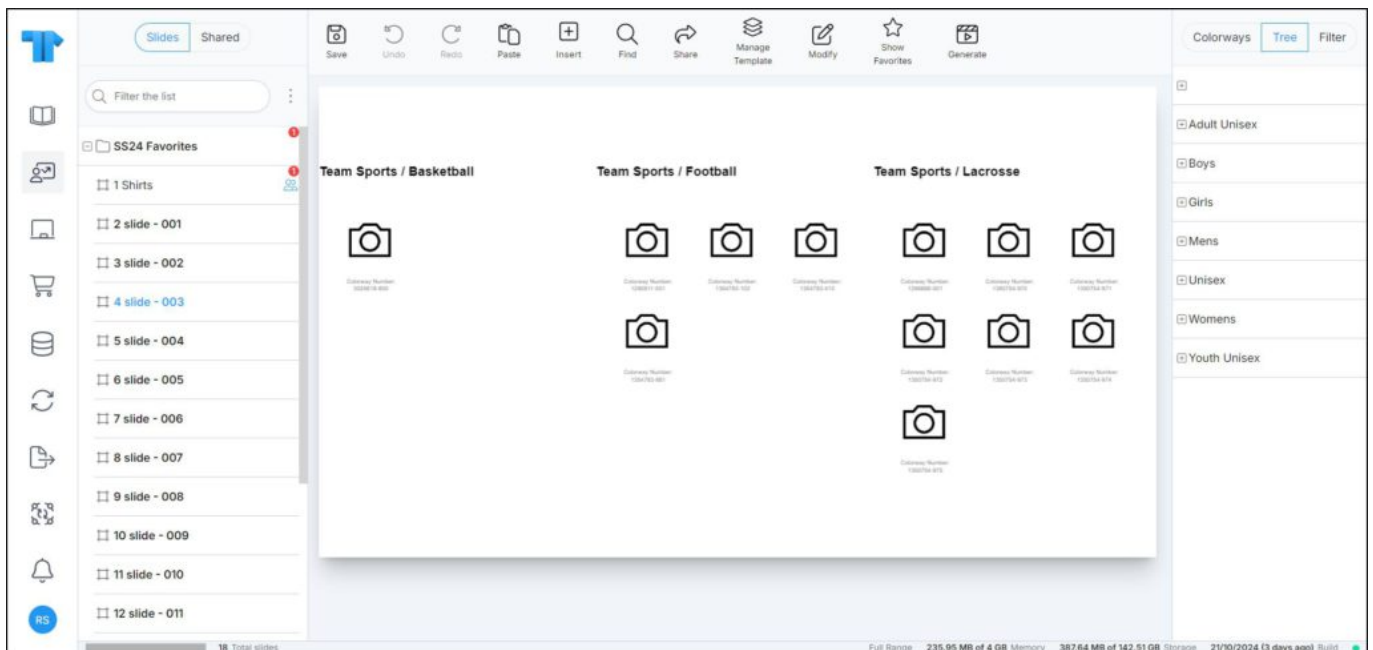

2. Select the folder to which you want to add the slides, or click + and add a new folder to which the generated slides are to be added,
3. Select the row label attributes, and the column label attributes, you can select up to 3,
4. Select the colorway attributes which you want to display, the list of attributes must be configured for the catalog by Trasix Support team,
5. Select whether you want to fit the colorways into one page, the maximum number of rows are set to 4 and these fields are disabled. Also, image size and font size are fixed if this slider is enabled,
6. Select the number of columns you want in each slide, by default it is "1", and you can add up to "6" columns,
7. Select the size in which you want to add the images,
8. Change the font size for the horizontal and vertical axis labels, if you want by clicking (+) and (-),
9. Select the image type that you want to add to the slide,
10. Select the slide size, the selected size appears next to the slide name,
11. Select the attribute based on which colorways are grouped, if you want,
12. Select whether you want the title on every slide by clicking the slider button,
13. Enter the slide title, if you want, if the slider is on but no title is entered, there will be an empty title box to enable users to add it manually on slides,
14. Select the attribute(s) based on which attributes are sorted - ascending or descending, then select the order in which you want the colorways to be sorted,
15. Click the slider button if you want to group colorways by model,
16. Click the slider button if you want to show the SKU count on slides,

17. Click **Next**, the following window appears:

The message informs you that only the maximum supported number of colorways will be generated.

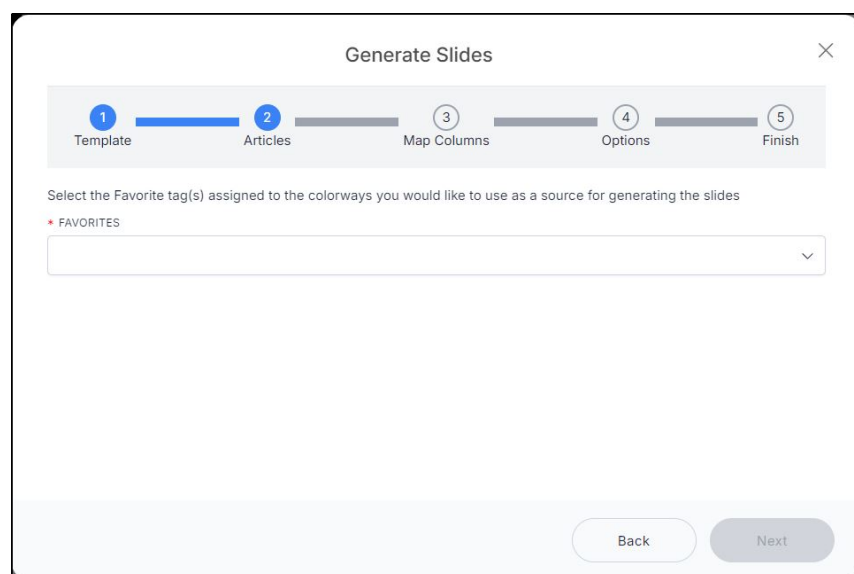

18. Click **Finish**, slides are created as shown in the below example:

## Favorites

To generate slides for your favorite colorways, follow these steps:

1. Select the radio button next to (Favorites), then click **Next**, the following window appears:

The screenshot shows a window titled "Generate Slides" with a close button (X) in the top right corner. At the top, there is a progress bar with five steps: 1. Template, 2. Articles, 3. Map Columns, 4. Options, and 5. Finish. Step 2, "Articles", is currently selected. Below the progress bar, there is a text prompt: "Select the Favorite tag(s) assigned to the colorways you would like to use as a source for generating the slides". Underneath this prompt is a dropdown menu with a red asterisk and the word "FAVORITES" next to it. The dropdown menu is currently empty. At the bottom of the window, there are two buttons: "Back" and "Next".

2. Select the favorite tag you want then repeat the steps mentioned above for generating slides for Full Catalog,
3. Click **Next** then **Finish**, slides with your favorite colorways are generated.

## List of colorways

To generate slides using a list of colorways, follow these steps:

1. Select the radio button next to (List of Colorways), then click **Next**, the following window appears:

Generate Slides

1 Template 2 Articles 3 Map Columns 4 Options 5 Finish

Provide a list of colorways that you would like to use as a source for generating the slides. Each colorway number should be on its own line

\* LIST OF COLORWAYS

List of Colorways

Back Next

2. Enter the colorway numbers, then follow the steps mentioned above for generating slides for Full Catalog,
3. Click **Next** then **Finish**, slides with the specified colorways are created.

## List of styles

To generate slides using a list of styles, follow these steps:

1. Select the radio button next to (List of Styles), then click **Next**, the following window appears:

Generate Slides

1 Template 2 Articles 3 Map Columns 4 Options 5 Finish

Provide a list of styles that you would like to use as a source for generating the slides. Each style number should be on its own line

\* LIST OF STYLES

List of Styles

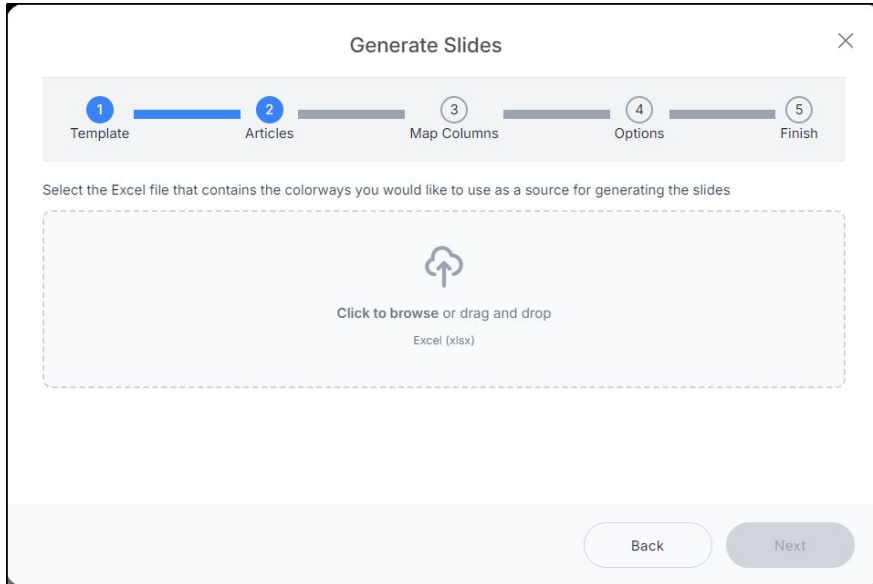

Back Next

2. Enter the style numbers, then follow the steps mentioned above for generating slides for Full Catalog,
3. Click **Next** then **Finish**, slides with the specified colorways are created.

## Excel file

To generate slides using colorways from an Excel sheet, follow these steps:

1. Select the radio button next to (Excel File) then click **Next**, the following window appears:

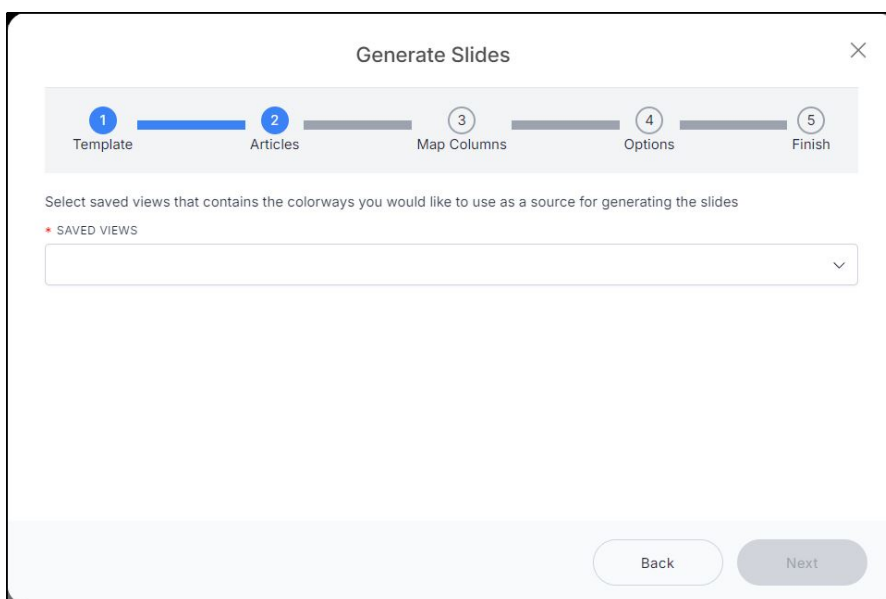

2. Click Select File and browse for the file which contains the colorways,
3. Click **Next**, then **Finish**, slides with the specified colorways are created.

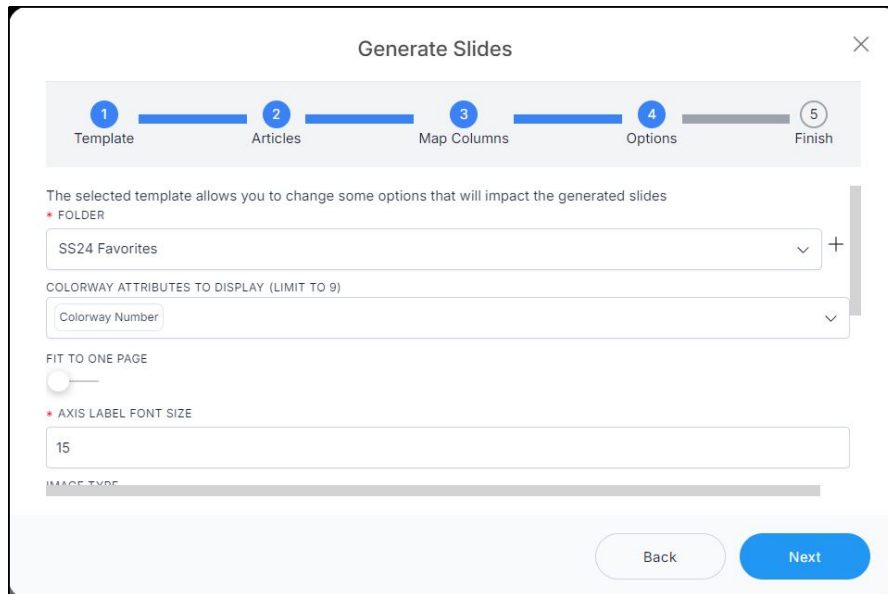

## Saved views

To generate slides using colorways from your saved views, follow these steps:

1. Select the radio button next to (Saved Views) then click **Next**, the following window appears:

Select the view you want, you can select more than one, unique colorways for the selected views are exported. Click **Next**, the Options window appears as shown below:

The screenshot shows a window titled "Generate Slides" with a close button (X) in the top right corner. At the top, there is a progress bar with five steps: 1. Template, 2. Articles, 3. Map Columns, 4. Options, and 5. Finish. Steps 1, 2, and 3 are marked with blue circles and lines, while step 4 is highlighted with a blue circle and line, and step 5 is a grey circle and line. Below the progress bar, the text reads: "The selected template allows you to change some options that will impact the generated slides".

Options include:

- FOLDER**: A dropdown menu showing "SS24 Favorites" with a plus sign to its right.
- COLORWAY ATTRIBUTES TO DISPLAY (LIMIT TO 9)**: A dropdown menu showing "Colorway Number".
- FIT TO ONE PAGE**: A toggle switch that is currently turned off.
- AXIS LABEL FONT SIZE**: A text input field containing the number "15".
- IMAGE TYPE**: A dropdown menu that is currently greyed out.

At the bottom of the window, there are two buttons: "Back" and "Next". The "Next" button is highlighted in blue.

Some options are already set by the selected view(s) and you can update the other options such as the colorway attributes, slide and image sizes, etc.
