# Delete article blocking attribute

To delete attributes, follow these steps:

1. Select the attributes you want to delete by following any of these methods:

   - Select "Delete Record" from the Actions menu next to the attribute you want to delete,
   - Click the checkbox on top of the records to select all attributes then click the **Delete** button,
   - Click the checkbox(es) next to the attributes you want then click the **Delete** button,

The following message appears showing the number of selected records:

You can click **Cancel** to keep the records.

2. Click **Delete Record** to confirm deleting the attributes. The attribute status changes to "Inactive".

You can activate the attribute by following the steps mentioned in "[Activate article blocking attributes](#)".
