

Import color palettes

You can import a file with color palettes instead of adding them individually which will save you time and effort. The palette name and colors are mandatory columns. You can also provide criteria for which colors are assigned to articles in JSON format. To import a file with color palettes, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header bar and a close button (X) in the top right corner. Below the header is a progress bar with six steps: 1. File (active, highlighted with a blue circle), 2. Sheet, 3. Mapping, 4. Filter (checked with a grey checkmark), 5. Validation, and 6. Information (checked with a grey checkmark). The main content area has two radio buttons: "Last Used File" (unselected) and "New File" (selected with a blue circle). Below the radio buttons is a text field labeled "Filename:" containing the placeholder text "[none]". To the right of the text field is a button labeled "SELECT...". At the bottom of the window are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

The screenshot shows a window titled "Import Data" with a close button (X) in the top right corner. Below the title bar is a progress bar with six steps: "File" (checked), "Sheet" (checked), "3 Mapping" (active), "Filter" (checked), "5 Validation" (checked), and "Information" (checked). The main area contains the text "Please select the sheet that contains the data you wish to import" and a dropdown menu currently showing "Color Palette". At the bottom, there are two buttons: "BACK" and "NEXT".

You can click **Back** to return to the previous window.

4. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
5. Click **Next**, the following window appears:

Information

Would you like to import all the rows in the sheet or only the rows that match a specific criteria?

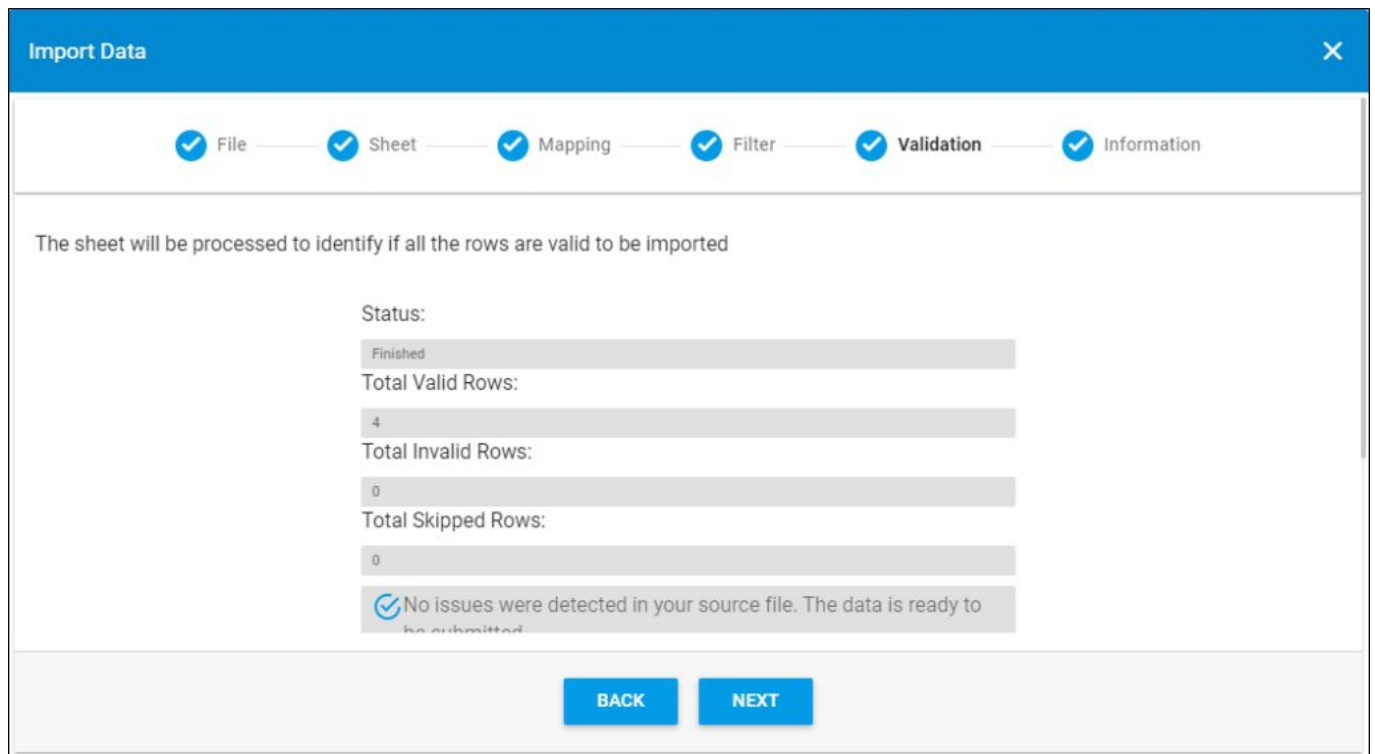

☒ Import All Rows

☐ Import Only the Rows that match the following criteria:

BACK

NEXT

7. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
8. Click **Next**, the following window appears:

The screenshot shows a 'Import Data' window with a blue header and a close button. A progress bar at the top indicates the current step is 'Validation', with previous steps 'File', 'Sheet', 'Mapping', 'Filter', and 'Information' marked as complete. The main content area states: 'The sheet will be processed to identify if all the rows are valid to be imported'. Below this, the status is 'Finished'. The results are: 'Total Valid Rows: 4', 'Total Invalid Rows: 0', and 'Total Skipped Rows: 0'. A green checkmark icon and message state: 'No issues were detected in your source file. The data is ready to be submitted.' At the bottom, there are 'BACK' and 'NEXT' buttons.

BACK NEXT

9. Click **Next**, the following window appears:

The image shows a modal dialog box titled "Import Data" with a blue header bar and a close button (X) in the top right corner. Below the header is a progress bar with six steps, each marked with a blue checkmark: "File", "Sheet", "Mapping", "Filter", "Validation", and "Information". The "Information" step is the final and active step. The main content area of the dialog is white and contains the text: "Your data is ready to be imported, please click on the Submit button below to submit the request to the server." At the bottom of the dialog, there is a light gray bar containing two blue buttons: "BACK" and "SUBMIT".

10. Click **Submit**, the progress is displayed,
11. Wait until the job is finished, then refresh the page, the imported values are listed.

Notes:

- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to *Skip invalid rows* as shown in the below example:
