

## Restrict bucket attributes

Through this tab, you can restrict bucket level attributes for a specific role and specify whether you want to allow this role users to view or edit bucket attributes. Go to **Restrict bucket attributes** tab, the following page appears:

Role Id	Role Name	Account Type Id	Account Type	Actions
<input type="checkbox"/> 2	Sales Person	2	Seller	⋮
<input type="checkbox"/> 31	Read Only Buyer	3	Buyer	⋮

Roles are listed, along with the account type Id, and account type. To view the restricted bucket attributes, select View bucket attributes from the Actions menu next to it, the following window appears:

Id	System Name	Attribute Name	Not Editable	Not Viewable
527	AR_End_Date	AR End Date	True	False
267	Additional_Comments_rqst	Comments	True	True

Attributes are listed along with their Id, system name, and whether the attribute is editable or viewable.

The following sections discuss how to manage restricting bucket attributes.
