# Restrict bucket attributes

Through this tab, you can restrict bucket level attributes for a specific role and specify whether you want to allow this role users to view or edit bucket attributes. Go to **Restrict bucket attributes** tab, the following page appears:

Roles are listed, along with the account type Id, and account type. To view the restricted bucket attributes, select View bucket attributes from the Actions menu next to it, the following window appears:

Bucket Attributes					✕
☐ ⤷ 0 of 2 Selected				⋮ ⟳	
Id ⇕	System Name ⇕	Attribute Name ⇕	Not Editable ⇕	Not Viewable ⇕	
☐ 527	AR_End_Date	AR End Date	● True	● False	
☐ 267	Additional_Comments_rqst	Comments	● True	● True	

Attributes are listed along with their Id, system name, and whether the attribute is editable or viewable.

The following sections discuss how to manage restricting bucket attributes.
