

Update via import (Style)

Through this option, you can import a file to update model level attribute values for multiple colorways by model number.

To update attributes via import, follow these steps:

1. Click the **Update via import (style)** button, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header bar and a close button (X) in the top right corner. Below the header is a progress bar with six steps: 1. File (active, blue circle), 2. Sheet (grey circle), 3. Mapping (grey circle), 4. Filter (grey circle with a checkmark), 5. Validation (grey circle with a checkmark), and 6. Information (grey circle with a checkmark). The main area of the window contains two radio buttons: "Last Used File" (unselected) and "New File" (selected, blue circle). Below these is a text field labeled "Filename:" with the value "[none]" and a "SELECT..." button to its right. At the bottom of the window are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field,
4. Click **Next**, the following window appears:

The image shows a software window titled "Import Data" with a blue header bar and a close button (X) in the top right corner. Below the header is a progress bar with six steps: "File", "Sheet", "Mapping", "Filter", "Validation", and "Information". The "Mapping" step is the current active step, indicated by a blue circle with the number "3" and a checkmark. The other steps are marked with grey circles and checkmarks. Below the progress bar, the text "Please select the sheet that contains the data you wish to import" is displayed. Underneath this text is a dropdown menu labeled "Update via Import (style)". At the bottom of the window, there are two blue buttons: "BACK" and "NEXT".

You can click **Back** to return to the previous window.

5. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
6. Click **Next**, the following window appears:

Import Data

The validation window shows the status of the import process, the total number of valid rows, and the total number of invalid and skipped rows. The above example shows that all the rows are valid.

11. Click **Next**, the following window appears:

A screenshot of a web application dialog box titled "Import Data" with a close button (X) in the top right corner. Below the title bar is a progress bar with six steps, each marked with a blue checkmark: "File", "Sheet", "Mapping", "Filter", "Validation", and "Information". The main area of the dialog contains the text: "Your data is ready to be imported, please click on the Submit button below to submit the request to the server." At the bottom of the dialog, there are two blue buttons: "BACK" and "SUBMIT".

Import Data

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — ✓ Validation — ✓ Information

Your data is ready to be imported, please click on the Submit button below to submit the request to the server.

BACK SUBMIT

12. Click **Submit**, a progress window is displayed,
13. Wait until the job is finished, values are imported.

Notes:

- Seasonless global seller attributes cannot be updated through child catalogs using the above import function.
- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to *Skip invalid rows* as shown in the below example:
