

Update via import (Style)

Through this option, you can import a file to update model level attribute values for multiple colorways by model number.

To update attributes via import, follow these steps:

1. Click the **Update via import (style)** button, the following window appears:

The screenshot shows a dialog box titled "Import Data" with a blue header and a close button. The dialog is divided into a progress bar at the top and a main content area. The progress bar has six steps: 1. File (active), 2. Sheet, 3. Mapping, 4. Filter (checked), 5. Validation, and 6. Information (checked). The main content area has two radio buttons: "Last Used File" (unselected) and "New File" (selected). Below the radio buttons is a text input field labeled "Filename:" containing "[none]" and a "SELECT..." button. At the bottom of the dialog are "BACK" and "NEXT" buttons.

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field,
4. Click **Next**, the following window appears:

Import Data

✓ File — ✓ Sheet — 3 Mapping — ✓ Filter — 5 Validation — ✓ Information

Please select the sheet that contains the data you wish to import

Update via Import (style) ▾

BACK NEXT

You can click **Back** to return to the previous window.

5. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
6. Click **Next**, the following window appears:

Import Data ✕

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **5** Validation — ✓ Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a * are mandatory and must be mapped before continuing.

🔍 Search

Style Number*	=	Style Number*	Style Number	✕
Story Tier	=	Story Tier	Story Tier	✕
		Calendar		

BACK **NEXT**

7. Select the column of the sheet that matches each field, you can search for the field you want using the search field,
8. Click **Next**, the following window appears:

Import Data ✕

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **5** Validation — ✓ Information

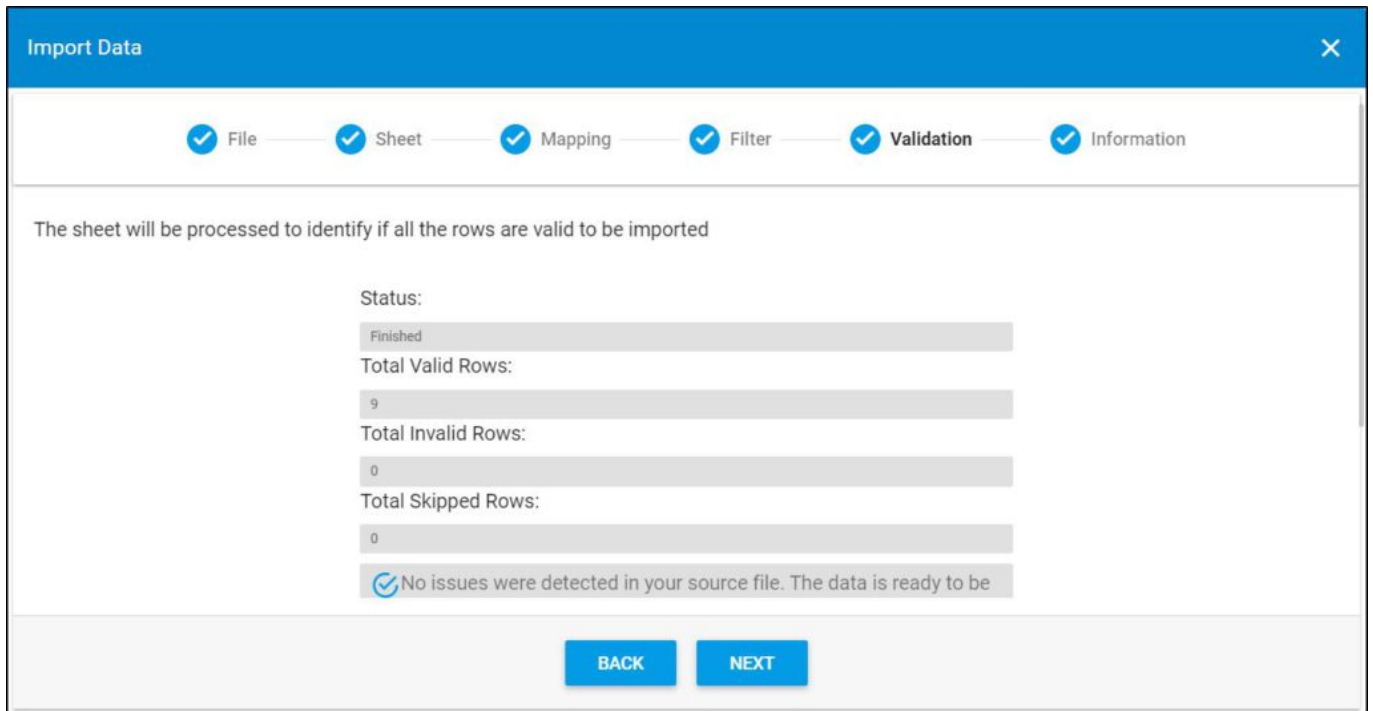

Would you like to import all the rows in the sheet or only the rows that match a specific criteria?

Import All Rows

Import Only the Rows that match the following criteria:

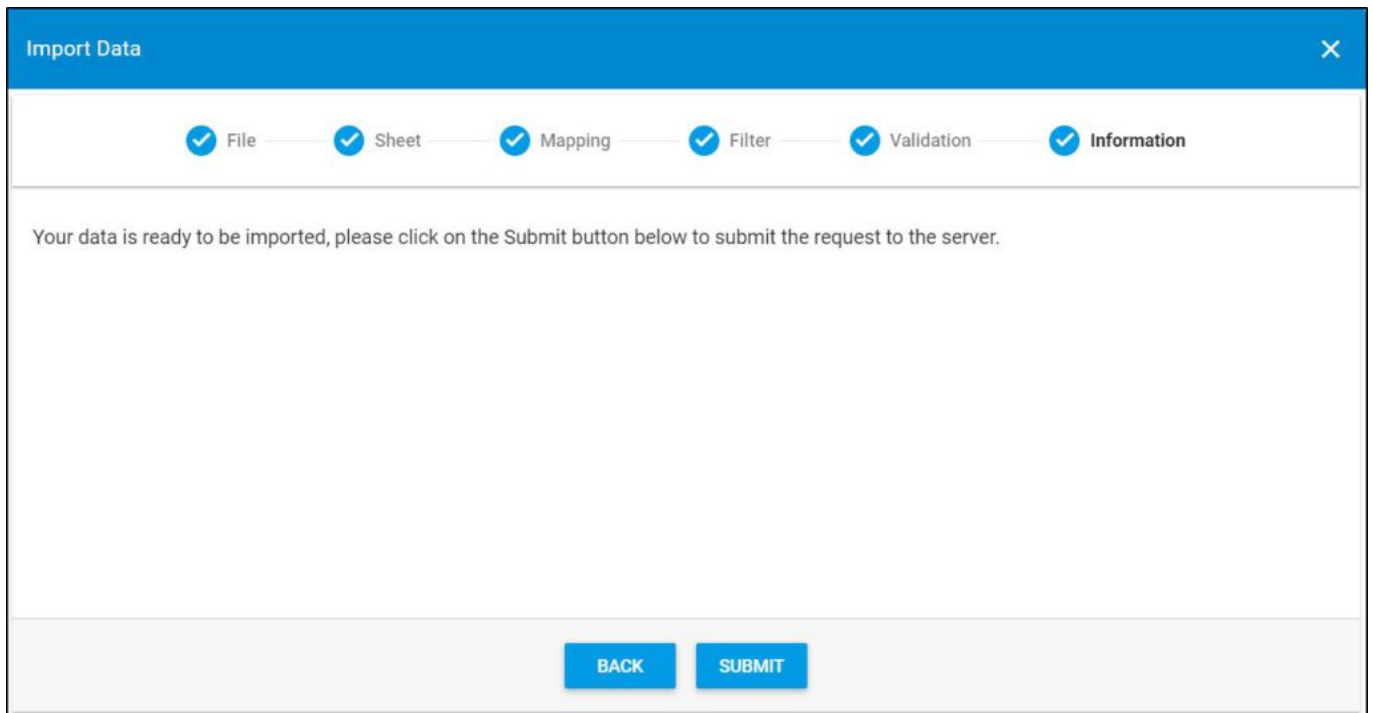

BACK **NEXT**

- Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
- Click **Next**, the following window appears:

The validation window shows the status of the import process, the total number of valid rows, and the total number of invalid and skipped rows. The above example shows that all the rows are valid.

- Click **Next**, the following window appears:

12. Click **Submit**, a progress window is displayed,
13. Wait until the job is finished, values are imported.

Notes:

- Seasonless global seller attributes cannot be updated through child catalogs using the above import function.
- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to *Skip invalid rows* as shown in the below example:

Import Data ×

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **5 Validation** — ✓ Information

Total Valid Rows:
1

Total Invalid Rows:
2

Total Skipped Rows:
0

! There are currently some invalid rows, please rectify these issues before continuing. GET RESULT

Skip invalid rows

BACK NEXT

The **Next** button is activated, and you can import the valid rows.
