

Set sizes to seller style

You can set sizes to a single style or by importing a file to set seller style sizes in bulk. Master size scales and size scales which are set to obsolete, cannot be set to seller styles.

Set sizes

To set sizes for a single style, select Set sizes from the Actions menu next to the style you want, the following window appears:

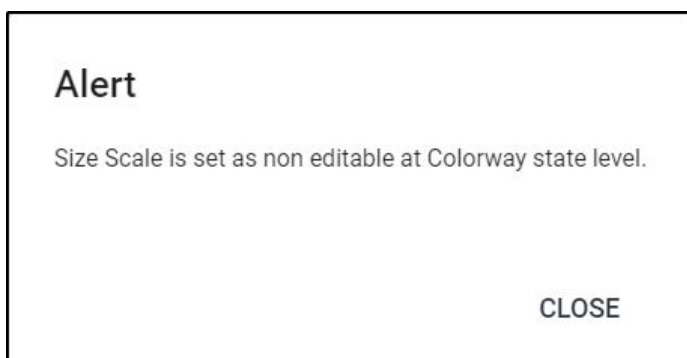

The screenshot shows a dialog box titled "Set Sizes" with a blue header bar containing a close button (X). The main area of the dialog is white and contains two input fields. The first field is labeled "Master Size Scale *" and the second field is labeled "Size Scale *". At the bottom right of the dialog, there are two buttons: "CANCEL" and "SAVE".

Select the master size scale then the size scale you want then click **Save**.

Notes:

- If the style is in a state for which the size scale is not editable, or in a later state, the following message appears when you try to set sizes:

The screenshot shows an alert dialog box with a white background and a black border. The title is "Alert". The message text reads: "Size Scale is set as non editable at Colorway state level." At the bottom right, there is a "CLOSE" button.

Click **Close**. For more information on colorway states, refer to "[Colorway states](#)".

- If the master size scale is set to obsolete at the seller level, a tooltip appears to inform you so as shown in the below example:

The master size scale cannot be changed. If size scales within the master size scale are set as obsolete, they are not displayed in the dropdown list and cannot be selected.

Set seller styles sizes (bulk)

You can import a file to map styles to size scales instead of adding them individually, this will save your time and effort. The Excel sheet should contain the style number and size scale as columns.

To import a file with styles and size scales, follow these steps:

1. Click the **Set styles sizes(bulk)** button, the following window appears:

Import Data

1 File — 2 Sheet — 3 Mapping — 4 Filter — 5 Validation — 6 Information

Last Used File

New File

Filename: [none] SELECT..

BACK NEXT

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

The screenshot shows the 'Import Data' window with a progress bar at the top. The steps are: 1. File (checked), 2. Sheet (active), 3. Mapping, 4. Filter, 5. Validation, and 6. Information (checked). Below the progress bar, there are two radio buttons: 'Last Used File' (unselected) and 'New File' (selected). Under 'New File', there is a text input field containing 'Seller Styles.xlsx' and a 'SELECT...' button to its right. At the bottom of the window, there are two buttons: 'BACK' (disabled) and 'NEXT' (active).

You can click **Back** to return to the previous window.

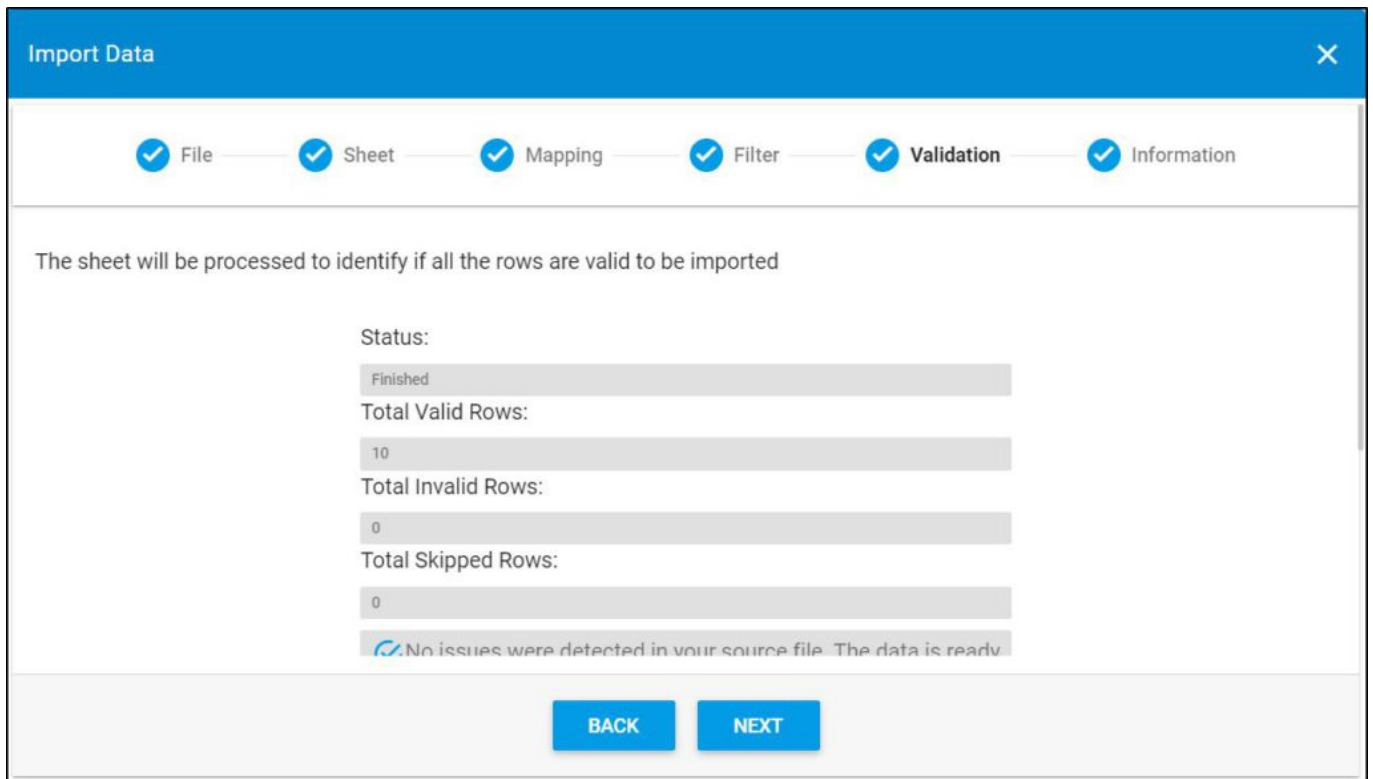

4. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet, then click **Next**, the following window appears:

The screenshot shows the 'Import Data' window with the progress bar updated: 1. File (checked), 2. Sheet (checked), 3. Mapping (active), 4. Filter, 5. Validation, and 6. Information (checked). Below the progress bar, there is a text instruction: 'Please select the columns in your sheet that match each of the following fields. All fields marked with a * are mandatory and must be mapped before continuing.' Below this instruction is a search bar with a magnifying glass icon and the text 'Search'. There are two mapping rows. The first row shows 'Style Number*' on the left, followed by an equals sign, and a dropdown menu containing 'Style Number' with a close button (X) on the right. The second row shows 'Master Size Scale*' on the left, followed by an equals sign, and a dropdown menu containing 'Master Size Scale*' on the right. At the bottom of the window, there are two buttons: 'BACK' (active) and 'NEXT' (disabled).

5. Select the column of the sheet that matches each field, you can search for the field you want using the search field, then click **Next**, the following window appears:

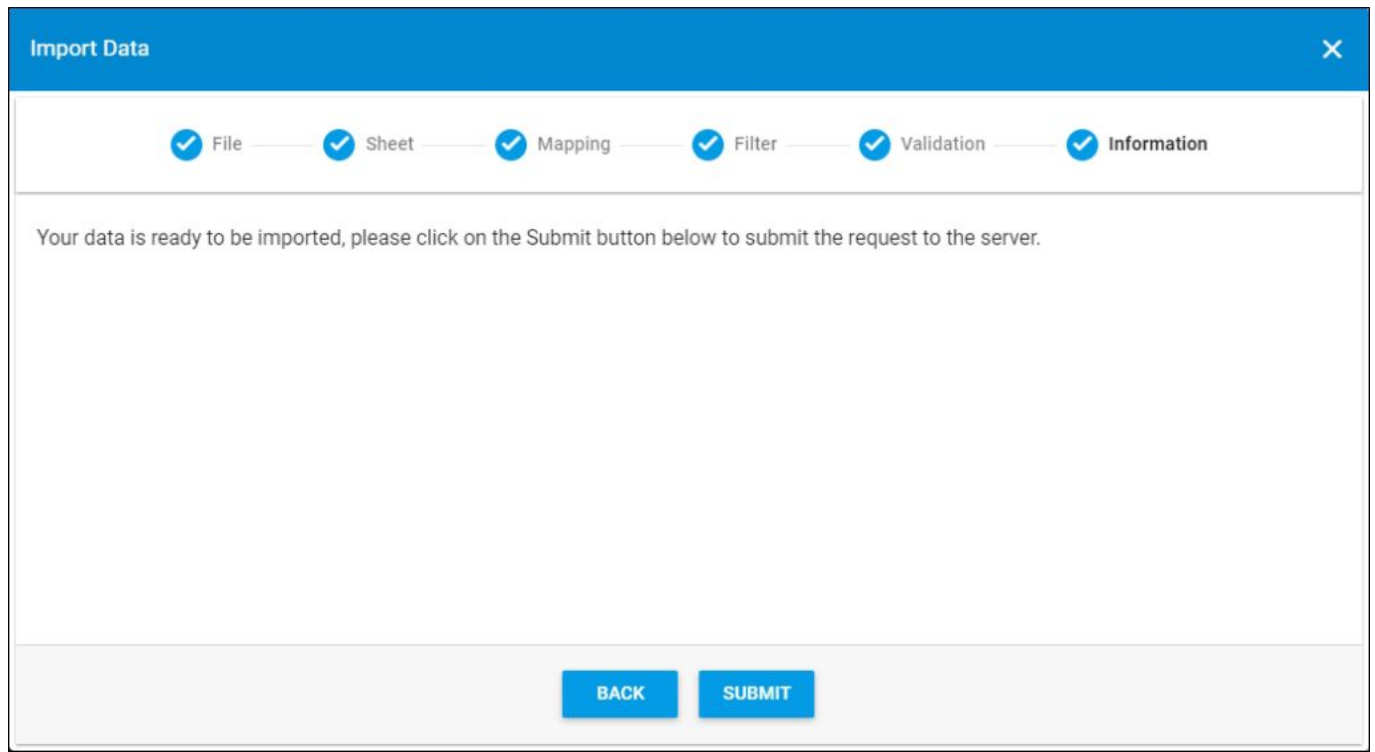

The screenshot shows a window titled "Import Data" with a blue header and a close button (X) in the top right corner. Below the header is a progress bar with six steps: "File", "Sheet", "Mapping", "Filter", "Validation", and "Information". Each step has a checkmark icon, and the "Validation" step is highlighted with a blue circle containing the number "5". Below the progress bar, the text reads: "Would you like to import all the rows in the sheet or only the rows that match a specific criteria?". There are two radio button options: "Import All Rows" (which is selected) and "Import Only the Rows that match the following criteria:". At the bottom of the window, there are two blue buttons labeled "BACK" and "NEXT".

6. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
7. Click **Next**, the following window appears:

The validation step lists the status of the import process, the total number of valid rows, and the total number of invalid and skipped rows. If there is an error in the sheet you are trying to import, the validation window will return an error and you need to fix the records with invalid data then import the sheet again.

8. Click **Next**, the following window appears:

9. Click **Submit**, a progress window is displayed,
10. Wait until the job is finished, then refresh the page, the size scales are assigned to styles.

Notes:

- If the style is in a state for which the size scale is not editable, or in a later state, size scales for those styles cannot be mapped and an error appears for the records.
- If you are trying to map an obsolete master size scale which is not already assigned to the seller style, those records are invalid and you can either view the Results sheet and correct them or skip the invalid rows.
- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to *Skip invalid rows* as shown in the below example:

Import Data ×

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **5 Validation** — ✓ Information

Total Valid Rows:
