

Edit configuration value

To update the value of any of the seller configurations, select Edit record from the Actions menu next to it, the following window appears:

The 'Edit Configuration' window features a blue header bar with the title 'Edit Configuration' and a close button (X). The main content area is white and contains a label 'Value *' followed by a text input field containing the list '[1,2,3,4,5,10,11]'. At the bottom right, there are two buttons: a dark grey 'CANCEL' button and a blue 'SAVE' button.

If the configuration is of type Boolean, a slider is displayed as shown in the below example:

The 'Edit Configuration' window features a blue header bar with the title 'Edit Configuration' and a close button (X). The main content area is white and contains a toggle switch labeled 'Value', which is currently turned on (blue). At the bottom right, there are two buttons: a dark grey 'CANCEL' button and a blue 'SAVE' button.

Update the values as required, then click **Save**.
