

Import lookup table values

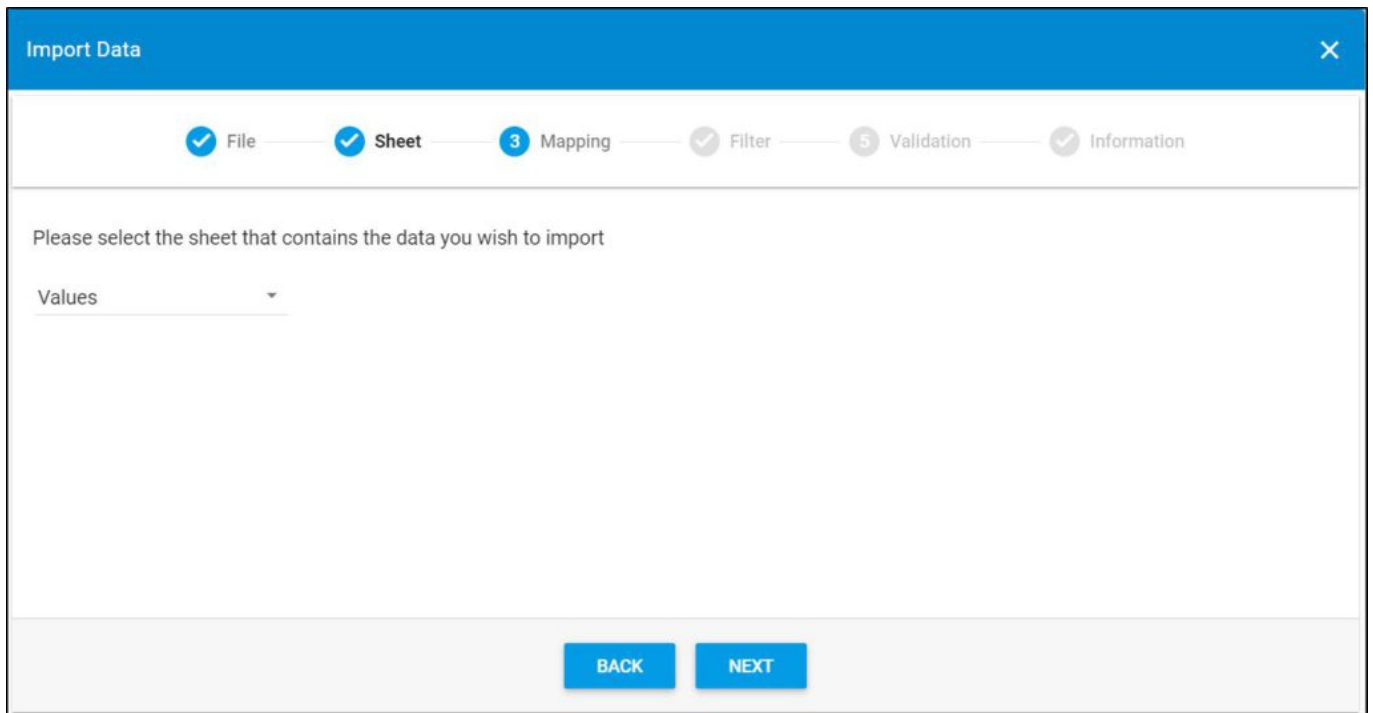

You can import a file to map the source and destination attributes values for a specific lookup table. Source attributes should not be duplicated. To do so, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header and a close button (X) in the top right corner. Below the header is a progress bar with seven steps: 1 File (active), 2 Sheet, 3 Mapping, 4 Filter (checked), 5 Validation, and 6 Information (checked). The main area contains two radio buttons: "Last Used File" (unselected) and "New File" (selected). Below the radio buttons is a text input field labeled "Filename:" with the placeholder text "[none]" and a "SELECT.." button to its right. At the bottom of the window are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

You can click **Back** to return to the previous window.

4. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
5. Click **Next**, the following window appears:

Import Data
✕

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — 5 Validation — ✓ Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a * are mandatory and must be mapped before continuing.

S:Class*	=	<div style="text-align: right; font-size: small; margin-bottom: 5px;">S:Class *</div> S:Class ✕
S:Sub Class*	=	<div style="text-align: right; font-size: small; margin-bottom: 5px;">S:Sub Class *</div> S:Sub Class ✕
		S:UA Division *
