

Import article colors

You can import a file with article colors instead of adding them individually, this will save your time and effort.

To import a file with article colors, the Excel sheet should contain article number, color name, and optionally the value for the print slider (true or false) as columns.

To import a file with article colors, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header bar and a close button (X) in the top right corner. Below the header is a progress bar with six steps: 1. File (active, blue circle), 2. Sheet (grey circle), 3. Mapping (grey circle), 4. Filter (grey circle with a checkmark), 5. Validation (grey circle), and 6. Information (grey circle with a checkmark). The main area of the window contains two radio buttons: "Last Used File" (unselected) and "New File" (selected, blue circle). Below these is a text field labeled "Filename:" with the placeholder text "[none]" and a "SELECT..." button to its right. At the bottom of the window are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header bar and a close button (X) in the top right corner. Below the header is a progress bar with six steps: "File", "Sheet", "Mapping", "Filter", "Validation", and "Information". Each step has a circular icon with a checkmark. The "Validation" step is highlighted with a blue circle containing the number "5". The main area of the window contains the text "Please select the sheet that contains the data you wish to import" followed by a dropdown menu currently showing "Article Color". At the bottom of the window are two blue buttons labeled "BACK" and "NEXT".

You can click **Back** to return to the previous window.

4. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet, then click **Next**, the following window appears:

Information

Would you like to import all the rows in the sheet or only the rows that match a specific criteria?

☒ Import All Rows

☐ Import Only the Rows that match the following criteria:

BACK

NEXT

6. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
7. Click **Next**, the following window appears:

Import Data

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **✓ Validation** — ✓ Information

The sheet will be processed to identify if all the rows are valid to be imported

Status:
Finished

Total Valid Rows:
2

Total Invalid Rows:
0

Total Skipped Rows:
0

✓ No issues were detected in your source file. The data is ready to be submitted.

BACK **NEXT**

The validation step lists the status of the import process, the total number of valid rows, and the total number of invalid and skipped rows. If there is an error in the sheet you are trying to import, the validation window will return an error and you need to fix the records with invalid data then import the sheet again.

8. Click **Next**, the following window appears:

Import Data
