

## Import line architecture articles

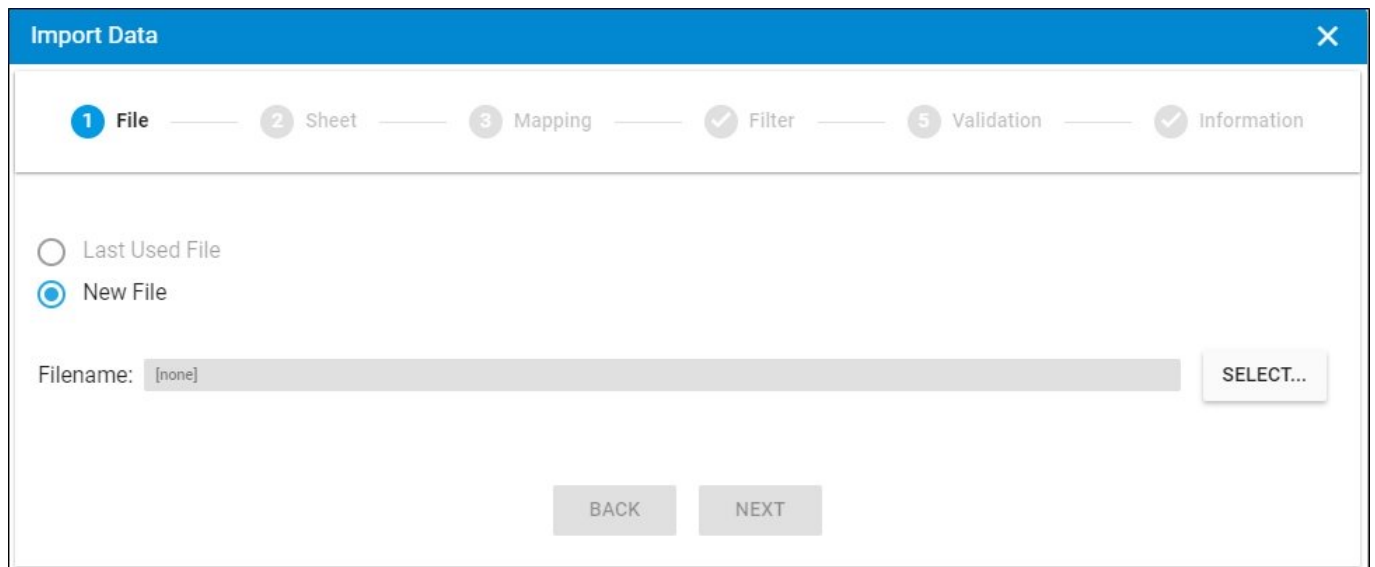

You can import multiple articles to T1 using the **Import** function, this will save time and effort needed to add a large number of articles to a line architecture catalog. Articles should be listed in an Excel sheet along with their attributes and the article number is optional.

### Notes:

- You can import a file with articles and the import process will either update the articles if the article number exists or create a new article with article number NN-xxxxxx (where xxxxxx is a 6 digit number). Article number is optional.
- If the article is of type carryover, linked attributes cannot be updated.

To import a file with articles, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows a dialog box titled "Import Data" with a close button (X) in the top right corner. The dialog has a progress bar with six steps: 1 File, 2 Sheet, 3 Mapping, 4 Filter (checked), 5 Validation, and 6 Information (checked). Below the progress bar, there are two radio buttons: "Last Used File" (unselected) and "New File" (selected). Below the radio buttons, there is a text field labeled "Filename:" containing "[none]" and a "SELECT..." button. At the bottom of the dialog, there are "BACK" and "NEXT" buttons.

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field,
4. Click **Next**, the following window appears:

**Import Data** [X]

File —  **Sheet** — **3** Mapping —  Filter — **5** Validation —  Information

Please select the sheet that contains the data you wish to import

Articles ▾

**BACK** **NEXT**

You can click **Back** to return to the previous window.

5. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
6. Click **Next**, the following window appears:

**Import Data** [X]

File —  Sheet — **3** Mapping —  Filter — **5** Validation —  Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a \* are mandatory and must be mapped before continuing.

🔍 Search

|                 |   |                  |                |     |
|-----------------|---|------------------|----------------|-----|
| Article Number* | = | Article Number * | Article Number | [X] |
| Model Number    | = | Model Number     | Model Number   |     |

**BACK** **NEXT**

7. Select the column of the sheet that matches each field, you can search for the field you want using the search field, then click **Next**, the following window appears:

**Import Data** [X]

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **5** Validation — ✓ Information

Would you like to import all the rows in the sheet or only the rows that match a specific criteria?

Import All Rows

Import Only the Rows that match the following criteria:

**BACK** **NEXT**

8. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
9. Click **Next**, the following window appears:

**Import Data** [X]

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — ✓ **Validation** — ✓ Information

The sheet will be processed to identify if all the rows are valid to be imported

Status:  
Finished

Total Valid Rows:  
9

Total Invalid Rows:  
0

Total Skipped Rows:  
24

No issues were detected in your source file. The data is ready to be submitted.

The validation step lists the status of the import process, the total number of valid rows, and the total number of invalid and skipped rows. If the criteria you defined does not return any records, or there is an issue with any of the records, you need to update the file and import it again.

10. Click **Next**, the following window appears:

Import Data ✕

File —  Sheet —  Mapping —  Filter —  Validation —  Information

Your data is ready to be imported, please click on the Submit button below to submit the request to the server.

11. Click **Submit**, the progress is displayed and articles are imported.

**Notes:**

- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to *Skip invalid rows* as shown in the below example:

Import Data ✕

File —  Sheet —  Mapping —  Filter — **5** Validation —  Information

Total Valid Rows:  
1

Total Invalid Rows:  
2

Total Skipped Rows:  
0

! There are currently some invalid rows, please rectify these issues before continuing.

Skip invalid rows

The **Next** button is activated, and you can import the valid rows.
