

Update via Import (Model)

Through this option, you can import a file to update attribute values for multiple articles by model number.

Notes:

- Model numbers listed in the Excel sheet should exist for the selected catalog, and should be unique.
- Columns that are not mapped through the import are not affected.

To update articles via import, follow these steps:

1. Click , the following window appears:

The 'Import Data' dialog box features a blue title bar with a close button. Below the title bar is a progress bar with six steps: 1 File, 2 Sheet, 3 Mapping, 4 Filter (checked), 5 Validation, and 6 Information (checked). The main area contains two radio buttons: 'Last Used File' and 'New File' (selected). Below these is a 'Filename:' label followed by a text field containing '[none]' and a 'SELECT...' button. At the bottom are 'BACK' and 'NEXT' buttons.

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field,
4. Click **Next**, the following window appears:

Import Data [X]

☒ File —
 ☒ Sheet —
 3 Mapping —
 ☐ Filter —
 5 Validation —
 ☐ Information

Please select the sheet that contains the data you wish to import

BACK NEXT

You can click **Back** to return to the previous window.

5. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
6. Click **Next**, the following window appears:

Import Data [X]

☒ File —
 ☒ Sheet —
 3 Mapping —
 ☐ Filter —
 5 Validation —
 ☐ Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a * are mandatory and must be mapped before continuing.

🔍 Search

Model Number*	=	Model Number *
Gender	=	Gender

BACK NEXT

7. Select the column of the sheet that matches each field, you can search for the field you want using the search field, then click **Next**, the following window appears:

Import Data [X]

☒ File
 ☒ Sheet
 ☒ Mapping
 ☒ Filter
 5 Validation
 ☐ Information

Would you like to import all the rows in the sheet or only the rows that match a specific criteria?

☒ Import All Rows
☐ Import Only the Rows that match the following criteria:

BACK NEXT

8. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
9. Click **Next**, the following window appears:

Import Data [X]

☒ File
 ☒ Sheet
 ☒ Mapping
 ☒ Filter
 ☒ Validation
 ☒ Information

The sheet will be processed to identify if all the rows are valid to be imported

Status:

Finished

Total Valid Rows:

10

Total Invalid Rows:

0

Total Skipped Rows:

0

☒ No issues were detected in your source file. The data is ready to be submitted.

BACK NEXT

The validation window shows the status of the import process, the total number of valid rows, and the total number of invalid and skipped rows. The above example shows that all the rows are valid.

10. Click **Next**, the following window appears:

Import Data

✓ File

✓ Sheet

✓ Mapping

✓ Filter

✓ Validation

✓ Information

You are about to overwrite data for all Colorways(Model Number).

BACK

SUBMIT

11. Click **Submit**, the progress is displayed,
12. Wait until the job is finished, then refresh the page, the imported values are listed.

Notes:

- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to *Skip invalid rows* as shown in the below example:
