

Import catalog segmentations

You can import a file with catalog segmentations instead of adding them individually, this will save your time and effort.

To import a file with segmentations, make sure to have the segmentations listed in an Excel sheet with the following columns: Segmentation, Description (optional).

To import a file with segmentations, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header bar and a close button (X) in the top right corner. Below the header is a progress bar with six steps: 1 File (selected with a blue circle), 2 Sheet, 3 Mapping, 4 Filter (checked with a grey checkmark), 5 Validation, and 6 Information (checked with a grey checkmark). The main area of the window contains two radio buttons: "Last Used File" (unselected) and "New File" (selected with a blue circle). Below these is a text field labeled "Filename:" containing the text "[none]". To the right of the text field is a button labeled "SELECT...". At the bottom of the window are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

The image shows a dialog box titled "Import Data" with a blue header bar and a close button (X) in the top right corner. Below the header is a progress bar with six steps: "File" (checked), "Sheet" (checked), "Mapping" (active, highlighted with a blue circle and number 3), "Filter" (checked), "Validation" (active, highlighted with a grey circle and number 5), and "Information" (checked). The main area of the dialog contains the text "Please select the sheet that contains the data you wish to import" and a dropdown menu currently showing "Segmentations". At the bottom of the dialog are two blue buttons labeled "BACK" and "NEXT".

You can click **Back** to return to the previous window.

4. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet, then click **Next**, the following window appears:

Information

Would you like to import all the rows in the sheet or only the rows that match a specific criteria?

☒ Import All Rows

☐ Import Only the Rows that match the following criteria:

BACK

NEXT

6. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
7. Click **Next**, the following window appears:

Import Data

✓ File

✓ Sheet

✓ Mapping

✓ Filter

✓ Validation

✓ Information

The sheet will be processed to identify if all the rows are valid to be imported

Status:

Finished

Total Valid Rows:

1

Total Invalid Rows:

0

Total Skipped Rows:

1

✓

No issues were detected in your source file. The data is ready to be submitted.

BACK

NEXT

The validation step lists the status of the import process, the total number of valid rows, and the total number of invalid and skipped rows. If the criteria you defined does not return any records, an error appears as shown in the below example:
