

## Linked attributes

If the selected catalog is a line architecture catalog, you can specify whether the linked attributes added when the catalog is defined are editable or not. Editable attributes values can be changed when adding carryover articles in both T1 and T1 Studio. The Linked Attributes tab appears as shown below:

Attribute Name	Updated Date	Editable	Status	Attribute Type Name	Actions
<input type="checkbox"/> Color	Mar 18, 2021	False	Active	nvarchar	⋮
<input type="checkbox"/> Gender	Mar 18, 2021	False	Active	nvarchar	⋮
<input type="checkbox"/> Category	Mar 18, 2021	False	Active	nvarchar	⋮
<input type="checkbox"/> Weight	Mar 18, 2021	False	Active	int	⋮
<input type="checkbox"/> End Use	Mar 18, 2021	False	Active	nvarchar	⋮

The linked attributes for the selected line architecture catalog are listed. To set any of the attributes as editable, select “Make Editable” from the action menu next to the attribute. The option changes to Make Non-Editable.
