

Import customer locations

You can import a file with customer locations instead of adding them individually which will save you time and effort. The customer number, location code, name, and country are mandatory columns. To import a file with locations, follow these steps:

1. Click the **Import locations** button, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header bar and a close button (X) in the top right corner. Below the header is a progress bar with six steps: 1. File (active, blue circle), 2. Sheet (grey circle), 3. Mapping (grey circle), 4. Filter (grey circle with a checkmark), 5. Validation (grey circle), and 6. Information (grey circle with a checkmark). The main area of the window contains two radio buttons: "Last Used File" (unselected) and "New File" (selected, blue circle). Below the radio buttons is a text field labeled "Filename:" with the value "[none]" and a "SELECT..." button to its right. At the bottom of the window are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

Import Data

✓ File — ✓ Sheet — 3 Mapping — ✓ Filter — 5 Validation — ✓ Information

Please select the sheet that contains the data you wish to import

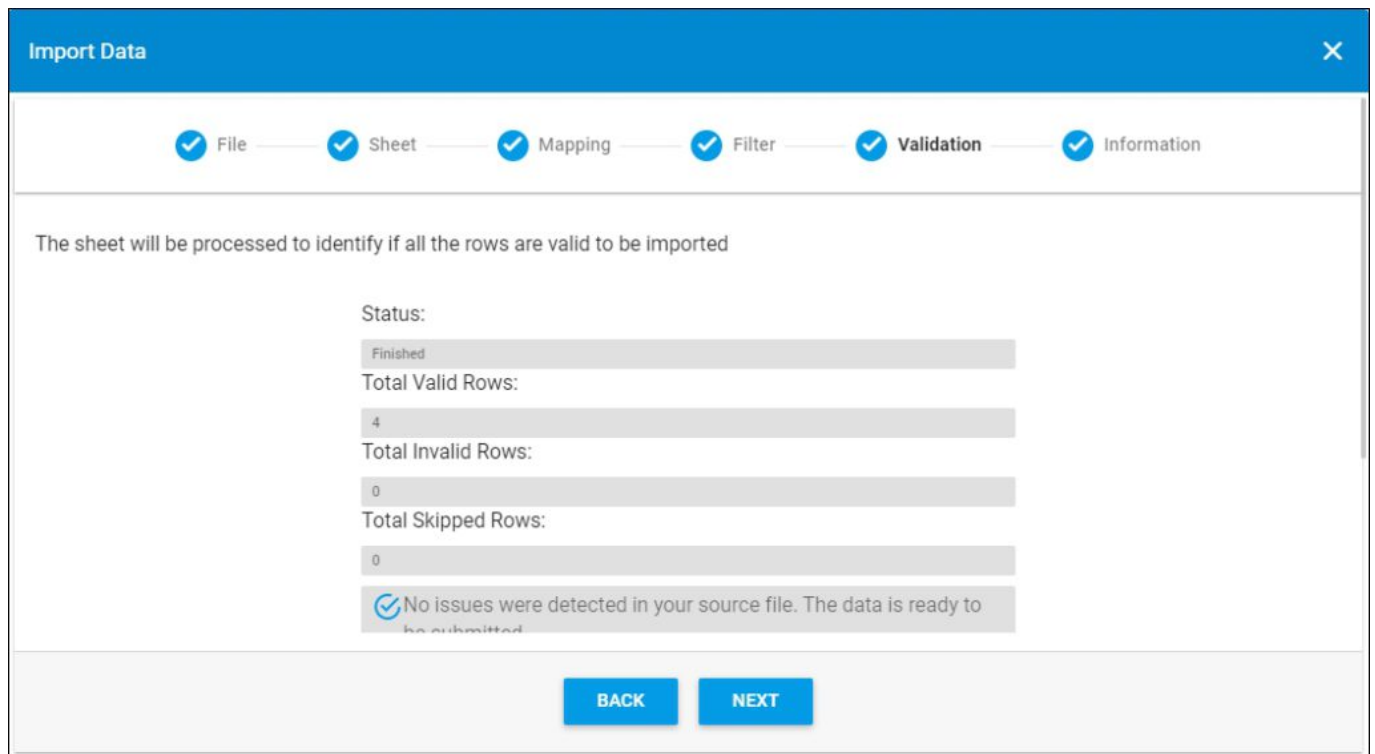

customer locations ▼

BACK NEXT

You can click **Back** to return to the previous window.

4. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
5. Click **Next**, the following window appears:

7. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
8. Click **Next**, the following window appears:

The screenshot shows a 'Import Data' window with a blue header and a close button. A progress bar at the top indicates the current step is 'Validation', with previous steps 'File', 'Sheet', 'Mapping', 'Filter', and 'Information' marked as complete. The main content area states: 'The sheet will be processed to identify if all the rows are valid to be imported'. Below this, the status is 'Finished'. The results are: 'Total Valid Rows: 4', 'Total Invalid Rows: 0', and 'Total Skipped Rows: 0'. A green checkmark icon and message state: 'No issues were detected in your source file. The data is ready to be submitted.' At the bottom, there are 'BACK' and 'NEXT' buttons.

Import Data

File Sheet Mapping Filter **Validation** Information

The sheet will be processed to identify if all the rows are valid to be imported

Status:
Finished

Total Valid Rows:
4

Total Invalid Rows:
0

Total Skipped Rows:
0

✓ No issues were detected in your source file. The data is ready to be submitted.

BACK NEXT
